Pending the discussion of the bill impos-ing the higher duties, we ventured the prediction that it would not result in the domestic growers realizing any higher prices for their product. We are willing now to compare results with our prophecy. The following comparison will show the current value of domestic, compared with

It will be thus seen that prices, on the average, rule lower than before the duties were enhanced. The diminution of our imports is likely to put down the price of Wool in the foreign markets, and induce an increase of the importations, which will be quite likely to tell against the value of ne-grown Wools .- New York Econ-

The imports of foreign Wool at New York for the first half of the calendar year are only about half the quantity and value of those for the same period of last year. of those for the same period of last year. For the first six mouths of 1867 we imported 13,000,000 lbs, valued at \$2,233,000, against 6,700,000 lbs this year (1868), valued at \$1,-105,000. The decrease has been principally in the arrivals from Eagland, the Argentine Republic and Mexico, while those from Russia have been doubled. The abundance of the home crop, especially in California and Texas, has limited our wants for foreign descriptions. The following statement shows the comparative receipts for the first six months of 1867 and 1868: the first six months of 1867 and 1868: IMPORTS OF FOREIGN WOOL AT NEW YORK DURING THE FIRST SIX MONTHS IN 1868.
